

# Trinity Source of the Godhead

---

To understand the Tri-wave Consciousness, think of the three sources of the original primal sounds of universal creation—The Threefold Flame. The first unit, as an energy matrix unit is a tri-wave, that which contains potentials for all polarities or no polarity. No polarity means this is the neutral charge, or Zero Point, the Godhead is that central point of all union, which this planet is moving into direct alignment with. The Three Flames are all One, and yet they are distinct tones on their own. This is the paradox of Trinity Source of the God Head. The Holy Mother, the Holy Father and the Holy Son (Christos-Sophia) are all One as the Godhead, however, the Mother is not the Father, nor the Son. There is an energy matrix comprised of frequency that is a tri-wave tone, and this tone is inter-dimensional and also a part of the core substance of our Universal Time Matrix.

Threefold Founder Flame

When we come into understanding bipolar radiation; we understand the original trinity and completion of the source projecting out its consciousness units into a bi-wave polarity, which is the pair of opposites that manifest matter creations, through the masculine and feminine principles. The electromagnetic principles reflect the gender pairs, and this helps us understand the core manifestation structure from which all matter manifestation is built. In working with that bi-polar wave, it is the radiation unit that forms the electromagnetic scalar standing wave.

We could say the bi polar wave is the sub tone of the tri-tone wave. Through that bi polar light wave projection, is the electromagnetism that creates the particle and anti-particle template of our universal structure. The particle unit represents the contraction phase of that tri-wave energy unit, thinking of a big circle which contains all potentials, and using the example of in-breath and its out-breath of source. The particle unit is represented as the in breath of the energy that is contracted and received by that omni-polar or tri-tone state, the complete energy matrix. This is the base magnetic tone of that tri-tone energy unit. The anti-particle unit represents the outbreath or expansion phase of anti-matter or anti particle energy and is considered the base electrical. Together, we know these units function as the female and masculine principles of energy. This is to help us to understand that this is much more than gender as we think of it, and that gender principles have relevance in the core mechanics of creation, that is based on electromagnetic energy. Gender Principles, through the pair of opposites, create the continuing cycle of this tri-wave energy unit, projecting itself into a bi-wave spectrum of light. The energy thrust expands into an anti-particle vibration point, as an electrical force that, contracts into a particle vibration point, creating the magnetic pole. This is the third vibration or tone of the tri-wave that draws the entire composite energy back into the source. When the energy is drawn back into the source, the feedback loop of reciprocal source light is generated and expanded. Our goal during these end cycle times is to create the Tri-wave Consciousness that draws the composite energy back into the zero point as a feedback loop, back into the source of all creation. This trinity field creates an eternal and perpetual supply of life force that regenerates the consciousness bodies. This eternal supply of life force is the Cosmic Christos light and the trinity principle that is the Cosmic Christ Consciousness.

## Christ Consciousness is the Offspring of Hieros Gamos

What we have come to learn through the Guardian principle of Hieros Gamos is that the Christos Collective Consciousness is the child and offspring of the Holy Mother and Holy Father, and cannot be birthed into the physical world without both male and female principles and polarities equally unified to Zero Point. These principles of polarity, in both male and female, become unified between the internal and external manifestation, internally with the inner spirit and externally with the physical body.<sup>[1]</sup>

## Truth Spirit Qualities

(Tri-Wave or Service to Others Agenda)

Christ Consciousness is a collective consciousness force field of the Trinity Source of the Godhead, and any kind of entity can choose to embody the Inner Christos by becoming a human being, and evolve over time to become an embodied Christ. There are Ascended Christs embodied in male and female forms that have united their inner polarities through spiritual ascension to the zero point. One must inhabit an ascending planet in order to have the opportunity to spiritually evolve into a Christ and experience Cosmic Christ Consciousness, which is the status of a Cosmic Citizen that travels God-Sovereign-Free throughout the Universes. Eternal Love consciousness that is embodied in a form is unity intelligence, a tri-wave consciousness that is simultaneously recognized as the Inner Light of Christos.
